Secondary Glazing

Smyth House

Benefit: Safer

Type: New Build

of scratch resistant polycarbonate in place of glass and special anti-ligature controls were developed to operate the blinds. Access to operate the windows is via the use of specialist secure tools.

Smyth House opened in 1838 as a result of the County Asylums Act of 1808 which stipulated that every county must provide facilities for 'Pauper and criminal lunatics'.

St. Andrew's has always kept abreast with technological and medical advances and, in recent years, a number of new facilities have been built, including 'Smyth House', a women's residential unit designed to accommodate patients assessed as medium risk.

Working closely with main contractor, Gleeson, Selectaglaze's brief was to provide secondary glazing units with integral venetian blinds, adhering to St. Andrew's criteria of both high security and patient safety whilst permitting authorised personnel essential access to the primary windows.

Selectaglaze met the brief by installing their Series 40 side hung casements. Safety requirements to reduce the risk of injury to patients were covered by the use

Secondary Glazing

The Series 10 window has been tested BS7950 and is Secured by Design licensed product.

In addition to providing a secure environment the secondary windows will also reduce heat loss and almost eliminate draughts, making the rooms more comfortable and improving the energy performance of the building.

Since completion of this project, the Series 40 range has been upgraded to series 41.
